

Type2 Marine Protected Areas

Title	Type2 Marine Protected Areas
Creator	Environmental Reporting, Ministry for the Environment and Statistics New Zealand
Date	2015-10-21
Description	The location and extent of Type 2 marine protected areas in the territorial sea.
Source	Source: Department of Conservation Method: Type 2 marine protected areas (MPAs) are MPAs that are not marine reserves but meet the MPA protection standard that determines which management tool contribute to the 2005 MPA Policy and Implementation Plan. They are established in the territorial sea (to the 12 nautical mile limit).
