Lake submerged plant index, 1991 - 2019

Title

Lake submerged plant index, 1991-2019

Publisher

New Zealand's Environment Reporting Series: The Ministry for the Environment and Statistics
New Zealand

Description

The most recent assessment of ecological condition of 295 lakes in New Zealand assessed on at least one occasion between 1991 and 2019 was measured using the lake submerged plant index (LakeSPI). More information on this dataset and how it relates to our environmental reporting indicators and topics can be found in the attached data quality pdf.
