

Conservation status of indigenous freshwater species

Title	Conservation status of indigenous freshwater species
Publisher	New Zealand's Environment Reporting Series: The Ministry for the Environment and Statistics New Zealand
Description	We report on the conservation status and most recent change in status of indigenous (native), resident (breeds in New Zealand) freshwater fish and invertebrates that have been assessed by New Zealand Threat Classification System (NZTCS) expert panels. More information on this dataset and how it relates to our environmental reporting indicators and topics can be found in the attached data quality pdf.
