

Certificate and permitted activity applications 2016-17 to 2018-19

Title	Certificates and Deemed Permitted Activities 2016/17 to 2018/19
Publisher	Ministry for the Environment
Description	<p>DATA SOURCE: The National Monitoring System (NMS) dataset is compiled, from data supplied by Local Authorities (Regional, Unitary, and Territorial Councils), by the Ministry for the Environment as part of the NMS for the Resource Management Act. Whilst every effort has been made to ensure the accuracy of this data, the Ministry makes no representations or warranties about its accuracy, reliability, completeness or suitability for any particular purpose and disclaims all responsibility and all liability (including without limitation, liability in negligence) for all expenses, losses, damages (including indirect or consequential damage) and costs which you might incur as a result of the product being inaccurate or incomplete in any way or for any reason. All datasets are updated as new information becomes available. Description: All applications for certificates of compliance, existing use certificates or deemed permitted activities (boundary or temporary and marginal) issued, withdrawn or declined. The NMS monitors implementation of the RMA by local authorities and includes information on planning, consenting, monitoring and enforcement. Most of the questions asked in the NMS are the same from year to year. Some are added or dropped as information requirements change. A data dictionary is attached which describes the data collected about certificates of compliance, existing use certificates or deemed permitted activities (boundary or temporary and marginal) applications over time. The most recent (2018/19) data collection template and a guidance document to councils about how to fill out the collection template are also attached. Further information on the NMS and the dataset can be located on the Ministry website - https://www.mfe.govt.nz/rma/monitoring-rma-implementation</p>
