

Land use - Land cover classes, 1996, 2001, 2008, and 2012

Title
Land use - Land cover classes, 1996, 2001, 2008, and 2012

Publisher
New Zealand's Environment Reporting Series: The Ministry for the Environment and Statistics New Zealand

Description
Land use that results in a change from indigenous to exotic cover can cause biodiversity loss and reduce functioning of ecosystems. Using more land for agriculture, forestry, and urbanisation is the main driver reducing indigenous land cover across New Zealand. Column headings: area_ha = area of land cover measured in hectares This dataset relates to the "Land use" measure on the Environmental Indicators, Te taiao Aotearoa website.
