## Estimated fish and invertebrate bycatch in deep-water fisheries by year (1991-2012)

Title	Estimated fish and invertebrate bycatch in deep-water fisheries by year (1991-2012)
Publisher	New Zealand's Environment Reporting Series: The Ministry for the Environment and Statistics New Zealand
Description	The unintended catch of marine species other than the target species puts pressure on the populations of marine species by removing individuals or potentially modifying ecosystems. This dataset relates to the "Bycatch of fish and invertebrates" measure on the Environmental Indicators, Te taiao Aotearoa website.
