

## Number of warm days (above 25° C) for selected sites (1975–2013)

### Title

Number of warm days (above 25° C) for selected sites (1975–2013)

### Publisher

New Zealand's Environment Reporting Series: The Ministry for the Environment and Statistics  
New Zealand

### Description

The number of frost and hot days we experience each year can change in response to many climate factors, such as the warming pattern induced by El Niño. These numbers indicate the variations in our climate and are an important consideration in agriculture. They also affect our behaviour, for example, what we do to keep safe on icy roads or whether to use air conditioning to keep cool. further information can be found in: Tait, A, Macara, G, & Paul, V. (2014) Preparation of climate datasets for the 2015 Environmental Synthesis Report: Temperature, Rainfall, Wind, Sunshine and Soil Moisture. Prepared for Ministry for the Environment. Available at <https://data.mfe.govt.nz/x/Fwn9AL> on the Ministry for the Environment dataservice (<https://data.mfe.govt.nz/>). This dataset relates to the "Frost and hot days" measure on the Environmental Indicators, Te taiao Aotearoa website.
