Lake Water Quality for Swimming Categories

Title
| Lake Water Quality for Swimming Categories

Publisher
| Ministry for the Environment

Description
| Water quality for swimming categories for lakes with perimeters over 1.5 km. This dataset was used to compose the current state for water quality for swimming. This data is under review and will be updated in due course. This information is based on modelled and measured data using the approach outlined at <http://www.mfe.govt.nz/fresh-water/freshwater-management-reforms/water-quality-swimming-categories-attribute-states-detail> . The modelling methods used are outlined in Snelder et al. (2016) Strategic assessment of New Zealand's freshwaters for recreational use: a human health perspective. LWP Client Report 2016-011 <http://www.mfe.govt.nz/publications/fresh-water/strategic-assessment-of-new-zealand%E2%80%99s-freshwaters-recreational-use-human> LID: LID from Freshwater Environments of New Zealand (FENZ) Name: Lake name Lake_Perimeter(m): lake perimeter in metres Category: Water quality for swimming category see <http://www.mfe.govt.nz/fresh-water/national-targets-swimming-water-quality/water-quality-swimming-categories-attribute-> *Note blank cells are lakes where a prediction was not possible because of missing predictor variables Regional_council: Regional council
