Total Sunshine Hours, 1972–2016

Title

Total Sunshine Hours, 1972–2016

Publisher

New Zealand's Environment Reporting Series: The Ministry for the Environment and Statistics
New Zealand

Description

Interpolated total sunshine hours values at 30 regionally representative sites. Sunshine is essential for our mental and physical well-being and plant growth. It is also important for tourism and recreation. More information on this dataset and how it relates to our environmental reporting indicators and topics can be found in the attached data quality pdf.
